Oestrogen receptor status at CB
Neoadjuvant (Only) therapy with biological drugs
Isotype at CB_4.0
Radiotherapy on supraclavicular area
Grade at CB_3.0
Total administered dose
Adjuvant therapy using biological drugs
Side location of the lesion
Treatment in association with chemotherapy
Radiotherapy on chest wall
Isotype at CB_2.0
Chemotherapy performed
Age
Boost dose administered
Type of invasion at CB
N (Regional nodes affected)_1.0
Conventional RT fraction
Diagnostic panel missingness pattern_missing_3
Diagnostic panel missingness pattern_missing_7
Grade at CB_2.0
Progesterone receptor status at CB
Her2 overexpression (with immunohystochemistry) at CB_3.0
Isotype at CB_3.0
Ki67 positive cells (%) at CB
Adjuvant chemotherapy
N (Regional nodes affected)_23.0
Radiotherapy on internal mammary chain
State (if hormone therapy prescribed)
Her2 overexpression (with immunohystochemistry) at CB_2.0
