Oestrogen receptor status at CB
Neoadjuvant (Only) therapy with biological drugs
Radiotherapy (RT) performed
Grade at CB_3.0
Isotype at CB_4.0
Ki67 positive cells (%) at CB
Radiotherapy on supraclavicular area
Grade at CB_1.0
Diagnostic panel missingness pattern_complete
Diagnostic panel missingness pattern_missing_3
Conventional RT fraction
Diagnostic panel missingness pattern_missing_7
Grade at CB_2.0
Her2 overexpression (with immunohystochemistry) at CB_1.0
Her2 overexpression (with immunohystochemistry) at CB_2.0
Chemotherapy performed
Isotype at CB_1.0
Type of invasion at CB
Radiotherapy on internal mammary chain
N (Regional nodes affected)_23.0
Radiotherapy on chest wall
Side location of the lesion
Progesterone receptor status at CB
State (if hormone therapy prescribed)
Total administered dose
Treatment in association with chemotherapy
N (Regional nodes affected)_1.0
Age
N (Regional nodes affected)_0.0
Isotype at CB_3.0
Adjuvant therapy using biological drugs
Isotype at CB_2.0
Adjuvant chemotherapy
Her2 overexpression (with immunohystochemistry) at CB_3.0
Boost dose administered
