Oestrogen receptor status at CB
Neoadjuvant (Only) therapy with biological drugs
Age
Radiotherapy (RT) performed
Isotype at CB_4.0
Grade at CB_3.0
Progesterone receptor status at CB
Radiotherapy on supraclavicular area
Ki67 positive cells (%) at CB
Total administered dose
Conventional RT fraction
State (if hormone therapy prescribed)
Isotype at CB_1.0
Diagnostic panel missingness pattern_missing_3
N (Regional nodes affected)_0.0
N (Regional nodes affected)_1.0
Her2 overexpression (with immunohystochemistry) at CB_1.0
Side location of the lesion
Grade at CB_2.0
Chemotherapy performed
Adjuvant chemotherapy
Treatment in association with chemotherapy
Type of invasion at CB
Radiotherapy on chest wall
Diagnostic panel missingness pattern_complete
Boost dose administered
Diagnostic panel missingness pattern_missing_7
Adjuvant therapy using biological drugs
N (Regional nodes affected)_23.0
Isotype at CB_2.0
Her2 overexpression (with immunohystochemistry) at CB_3.0
Grade at CB_1.0
Her2 overexpression (with immunohystochemistry) at CB_2.0
Isotype at CB_3.0
Radiotherapy on internal mammary chain
