Oestrogen receptor status at CB
Neoadjuvant (Only) therapy with biological drugs
Isotype at CB_1.0
Her2 overexpression (with immunohystochemistry) at CB_1.0
Treatment in association with chemotherapy
Isotype at CB_4.0
Grade at CB_2.0
Grade at CB_3.0
Progesterone receptor status at CB
Radiotherapy on supraclavicular area
State (if hormone therapy prescribed)
Total administered dose
Side location of the lesion
Radiotherapy (RT) performed
Adjuvant therapy using biological drugs
Her2 overexpression (with immunohystochemistry) at CB_2.0
N (Regional nodes affected)_0.0
Grade at CB_1.0
Age
Chemotherapy performed
Radiotherapy on chest wall
Ki67 positive cells (%) at CB
Type of invasion at CB
Diagnostic panel missingness pattern_complete
N (Regional nodes affected)_1.0
Isotype at CB_2.0
Diagnostic panel missingness pattern_missing_7
Her2 overexpression (with immunohystochemistry) at CB_3.0
N (Regional nodes affected)_23.0
Diagnostic panel missingness pattern_missing_3
Radiotherapy on internal mammary chain
Adjuvant chemotherapy
Conventional RT fraction
Boost dose administered
Isotype at CB_3.0
